

STEELCOAT 50™ SYSTEM

(OR DENSO VOID FILLER™ TYPE 1)

An injectable petrolatum compound that fills voids and encapsulates pipes and cables

The Steelcoat 50™ System is a specially formulated petrolatum compound for pumping hot or cold to fully fill the space between tendons or cables and ducts where it forms a semi-solid paste that encapsulates the cable. Due to air, water and pollutants being excluded from the area, corrosion is prevented. The system is also used for the protection of anchorages.

Non-cracking, lightweight and allowing the easy removal of the protected tendon for inspection or replacement, Steelcoat 50 makes a sensible alternative to traditional cement mortar grout.

FEATURES

- Hot or cold applied
- Completely fills the void, stopping corrosion
- Non-cracking and lightweight
- A good alternative to traditional cement mortar grout

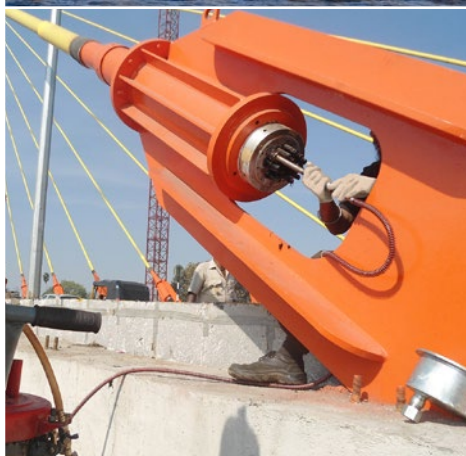

COMPONENTS

Denso Void Filler™ Type 1

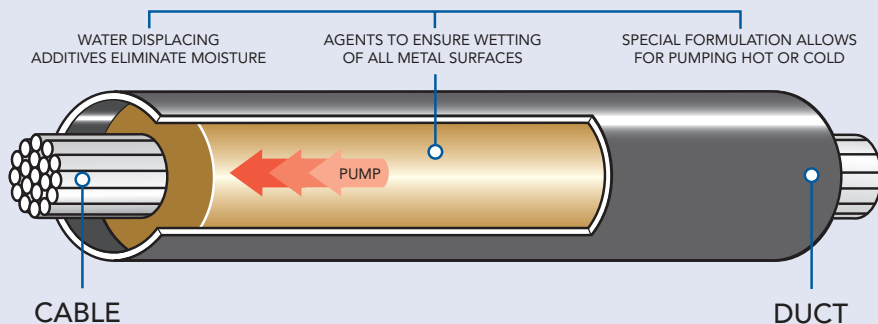

Denso Void Filler can be installed from drums, portable heated tanks or heated road tankers.

SURFACE PREPARATION

No surface preparation required.
